

01 — PLATFORM OVERVIEW

What is EduConnect?

EduConnect is a high-performance, cloud-based School Information System (SIS) purpose-built for Nigeria's primary and secondary schools. It centralizes every aspect of school management; administration, academic tracking, teacher workflows, and parent communication into a single, unified digital platform.

The platform is designed with the realities of Nigerian schools in mind: low-bandwidth environments, non-technical users, limited IT infrastructure, and the need for rapid adoption without extensive training. EduConnect works where other Ed-Tech solutions don't.

One Platform

All school operations in a single, high-fidelity web application. No switching tools, no duplication.

Built for Low Bandwidth

Engineered for reliability in areas with inconsistent internet connectivity.

Role-Based Access

Administrators, teachers, parents, and students, each with purpose-built dashboards.

02 — CORE MODULES & FEATURES

Platform Capabilities

The following modules highlight the full capability set planned for the EduConnect platform. Features are organized by functional area and release phase.

Module 1: School Administration & Setup

The foundation of every school's EduConnect deployment. Configure the platform to match your school's exact structure and academic calendar.

Academic Structure Configuration

Set up your school's complete academic framework before any other workflow begins.

- Define classes, arms (sections), and year groups (e.g. JSS1A, SS2B or Grade 1, Grade 8)
- Configure subjects per class and assign teachers to subjects
- Set up the Nigerian three-term academic calendar with custom term dates
- Academic year management with term start/end dates and holidays
- Nigerian grading framework pre-loaded: A1-F9 (WAEC standard) with configurable custom grading scales
- School public profile: name, logo, address, motto, and contact information

Student Enrollment & Records Management

A comprehensive digital register for every student in the school

- Digital student enrollment with full profile: name, date of birth, gender, class, state of origin, guardian

details

- Student ID generation and management
- Bulk student import via CSV or spreadsheet upload
- Student transfer management: intra-school class transfers and school exits
- Student status tracking: active, graduated, transferred, withdrawn
- Medical and allergy notes per student (visible to class teacher and admin)
- Searchable student directory with advanced filters

Staff Management

Manage all teaching staff from one centralised system.

- Staff profiles: full name, qualification, subject specialisation, contact details
- Role assignment: class teacher, subject teacher, head teacher, administrator
- Custom roles and permissions for large schools with complex hierarchies (Phase 3)
- Subject and class assignment per teacher
- Staff onboarding invitation via email with guided account setup

Module 2: Attendance Management

EduConnect digitizes attendance from marking to reporting, with real-time visibility for administrators and instant alerts for parents.

Teacher Attendance Marking

Aimed to be designed to be fast and friction-less.

- Daily class register: full student list displayed each school day
- One-tap marking: toggle Present / Absent / Late per student
- Bulk mark all present with individual exception marking
- Latecomer logging with optional time-of-arrival entry
- Absence reason recording: sick, family, unknown, or custom text
- Submit and lock attendance for the day (admin can unlock with audit trail)
- Retroactive attendance entry for missed days with explanatory note
- Offline attendance capture: mark attendance without internet, sync when connected (Phase 2)

Admin Attendance Overview

School-wide visibility into attendance patterns - by class, by student, and across the full term.

- School-wide daily attendance summary: percentage present per class, updated live as teachers submit
- Absentee list: every student absent today, exportable to PDF for follow-up
- Chronic absentee flag: students absent more than a configurable threshold (e.g. 20% of days) automatically flagged
- Class-level attendance report: weekly, monthly, and term summaries per class
- Individual student attendance history: full calendar or table view of present / absent / late
- Bulk attendance import for schools transitioning from paper registers

Parent Attendance Visibility

Parents get real-time insight into their child's attendance

- Today's attendance status displayed prominently on the parent dashboard home screen
- Monthly attendance calendar: colour-coded by day (green = present, red = absent, yellow = late)
- Term attendance rate displayed as a percentage with visual indicator
- Instant absence alert: push notification sent to parent the moment attendance is submitted
- Attendance history accessible for all previous terms

Module 3: Grades, Results & Report Cards

From daily continuous assessment to end-of-term report cards. EduConnect automates the entire academic results cycle, saving teachers hours of manual calculation.

Teacher Gradebook

A digital gradebook that handles the full assessment cycle used in Nigerian schools.

- Enter continuous assessment scores (CA1, CA2, CA3) and exam scores per student per subject
- Configurable score weighting: set the percentage contribution of each assessment type
- Automatic total score calculation and grade assignment (A1-F9)
- Subject position and class position auto-computed from entered grades
- Grade entry status: teacher can see which students are missing scores
- Bulk grade import from spreadsheet for schools with existing data
- Grade submission workflow: submit grades to admin for review before publishing
- Grade amendment with admin approval and full audit trail

Report Card Generation

Automated, professional report cards generated at the click of a button

- Admin initiates report card generation per class or for the entire school once grades are finalized
- Professional report card template: school logo, student details, subject table with CA scores, exam scores, total, grade, position, and remarks
- Class position and subject position auto-computed from all entered grades
- Class teacher remarks field: free-text entry before cards are finalised
- Head Teacher / Principal remarks section
- Nigerian grading key printed on every card (A1 = Excellent through F9 = Fail)
- Bulk PDF generation: all report cards for a class in a single download
- Individual student report card available for parent download from their portal
- Multiple report card templates with school colour and logo customisation (Premium)

Academic Performance Analytics

Aggregate academic data that gives administrators and teachers a clear picture of school-wide performance.

- Term results overview: average score per class per subject once grades are published
- Subject pass rate: percentage of students who passed each subject, per class
- Class performance ranking: which class achieved the highest average this term
- Comparative view: this term vs last term performance by class and subject
- Grade submission status dashboard: which teachers have submitted grades, which have not
- Individual student academic standing: current term grades at a glance for admin

- Subject teacher performance view: top 5 and bottom 5 students per subject
- Predictive at-risk identification: flag students showing declining performance patterns (Phase 3)

Parent Grade Visibility

Parents see their child's academic progress in real time

- Current term grades: live view of each subject's CA and exam scores as they are entered and released
- Subject performance breakdown: score per subject with grade letter and remark
- Class position: where the child ranks in their class this term
- Full term result and downloadable report card once published by school
- Historical results: all previous terms' grades accessible in a structured timeline
- Performance trend chart: subject-by-subject improvement or decline over time (Phase 2)

Module 4: Fee Management & Financial Tracking

A complete school fee management system integrated with Nigerian payment infrastructure, replacing manual cashbooks and the occasional screenshot confirmation of payments to schools.

Fee Structure & Invoice Management

Configure your school's full fee structure once and let EduConnect handle invoicing for every student, every term.

- Fee structure configuration: define fee types (tuition, development levy, PTA, uniform, exam fees, etc.) per class and per term
- Bulk invoice generation: one action creates invoices for all students in a class or the entire school
- Per-student invoice: auto-populated with applicable fee items based on the student's class
- Support for one-time fees, recurring term fees, and optional fees
- Invoice preview and editing before distribution
- Digital invoice delivery to parents via portal, email, or SMS

Payment Recording & Receipts

Track every naira collected, whether paid in cash, by bank transfer, or through integrated online payment.

- Manual payment recording: log cash, bank transfer, and POS payments received
- Paystack, Remita and Flutterwave integration for online fee payment directly from the parent portal (Phase 2)
- Automatic payment receipt generation on confirmation – downloadable as PDF
- Outstanding balance tracker per student: red / amber / green status at a glance
- School-wide fee collection summary: total collected, total outstanding, per-class breakdown
- Overdue alerts: admin notified when the term is X days old and students still have unpaid balances
- Payment history per student with full receipt archive

Parent Fee Portal

Parents always know exactly what they owe and what they've paid – reducing admin phone calls

significantly.

- Outstanding balance displayed prominently on the parent dashboard home
- Fee breakdown: a clear itemized list of what the balance is made up of
- Payment history with dates, amounts, and downloadable receipts
- Payment deadline visibility: days until the next fee due date
- Overdue fee alert: push notification when a payment deadline is passed
- Online payment option for parents to settle fees directly (Phase 2)

Module 5: Communication & Messaging

Replace bulky and overstimulating WhatsApp groups, personal phone numbers, and printed notices with a structured audited communication system connecting all stakeholders on one platform.

School-Wide Announcements

A managed broadcast system for sending important communications to parents, teachers, or specific groups.

- Announcement composer: write a message and select the audience (all parents, all teachers, specific class, specific parent)
- Multi-channel delivery: in-app notification, email, SMS, and WhatsApp (Phase 2)
- Announcement history and archive: full record of all past communications
- Attachment support: send PDFs, images, and documents with announcements

Parent-to-School Communication

A structured channel for parents to reach the school

- Parent can send a message directly to school administration from their portal
- Message templates for common queries: grade questions, absence explanations, fee queries, meeting requests
- Response time indicator: school sets expected response window (e.g. 'Typically responds within 1 business day')
- Full message history accessible to both parent and school
- Admin response tracked and linked back to the parent's original message

Notification System

A centralized notification architecture that manages how and when every user is alerted.

- Notification types: in-app bell icon, push notification (mobile/PWA), email, SMS
- Per-user notification preferences: each user chooses which alerts they receive and via which channel
- Unread count badge on the notification bell icon
- System notifications vs school notifications: clearly separated in the inbox
- WhatsApp Business API integration for parent notifications (Phase 2)

Module 6: Timetable Management

Create, publish, and manage your school's weekly timetable within EduConnect

School Timetable Builder

A structured timetable tool for administrators to plan and publish the full school schedule.

- Weekly timetable grid: assign subjects and teachers to periods for each class
- Admin full timetable view: filter by class or by teacher
- Export to PDF for printing and displaying on school noticeboards
- Publish to teachers and parents: timetable visible in each stakeholder's portal once published
- Exam timetable: separate module for publishing the term exam schedule (Phase 2)

Teacher Timetable View

Each teacher sees only their personal schedule. What class, what subject, what period.

- Personal weekly timetable: filtered to each teacher's assigned lessons only
- Today's lessons view: displayed prominently on the teacher dashboard homepage
- One-tap navigation: tap a lesson slot to go directly to that class's attendance or gradebook
- Timetable change notifications: teacher alerted when their schedule is updated by admin

Module 7: School Calendar & Events

Keep the entire school community aligned on important dates, events, and deadlines — visible to every user from the dashboard.

Academic Calendar Management

A school-wide calendar managed by administration and visible to all stakeholders.

- Term dates: start and end dates for each term, visible to all users
- School events: sports days, visiting day, open day, prize-giving, school celebrations
- Public holidays and school closure days
- Parent-teacher meeting scheduling with slot booking for parents (Phase 2)
- Exam timetable: visible to parents and students when published
- Fee payment deadlines shown on the calendar with colour coding
- Event reminder notifications sent to relevant stakeholders in advance

03 — ADVANCED & DIFFERENTIATING FEATURES

What Sets EduConnect Apart

Beyond the core school management suite, EduConnect is planning to build a set of advanced capabilities that distinguish it from generic SIS solutions.

AI-Powered Student Performance Insights

(Phase 3) Data-driven intelligence that helps schools identify struggling students before it's too late.

- At-risk prediction engine: identifies students showing patterns of academic decline before term-end
- Intervention log: teachers record actions taken for flagged students and track outcomes
- Learning gap detection: surfaces subjects and topics where class performance consistently drops
- Personalized performance report per student: trend analysis across all subjects and terms
- Requires two or more terms of data to generate meaningful predictions

Multi-Language Interface

(Phase 2) Breaking language barriers for broader adoption across Nigeria.

- Multi language interface option for all three dashboards
- Language can be toggled by individual users within their settings
- Professional translation used, not machine-generated
- Future support for additional languages based on demand

Multi-Campus & School Group Management

(Phase 3) For NGOs, mission schools, and educational groups managing multiple institutions.

- Group administrator dashboard: oversight of all campuses from a single login
- Cross-campus analytics: aggregate performance data across the school group
- Centralised staff and student management with campus-level segregation
- Group-wide announcement broadcasting
- Dedicated NGO programme dashboard for tracking education outcomes across sites

Custom Branding & White-Labeling

Premium schools can configure EduConnect to reflect their institutional identity.

- Upload school logo displayed across all portals and report cards
- Custom school colour scheme applied to report card templates
- Branded email notifications sent from the school's name
- Custom report card template selection from multiple professional designs

04 — RELEASE ROADMAP

How We Are Building EduConnect

EduConnect is built in three structured phases. Each phase is a coherent release that adds complete, tested functionality. Schools onboarding today will receive access to all Phase 2 and Phase 3 features as they are released, at no additional cost within their active plan.

Phase 1 Foundation Now — Current Release	Phase 2 Depth & Engagement 3–6 Months	Phase 3 Scale & Intelligence Year 1+
- Academic structure setup - Student, Parent and Staff basic information management. - Student enrollment & records - Teacher gradebook & grades - Admin, Parent & Teacher portal - Basic Analytics (accounts, activity and enrollment) - RBAC with secure login and authentication - Mobile-first responsive design - On-boarding wizard for new schools - Nigerian grading framework (A1–F9)	- Offline attendance & grade capture - Timetable management - Internal messaging system - Parent-to-school communication - WhatsApp notification delivery - Behaviour & conduct log - Multi-language interface (Hausa) - Paystack / Flutterwave integration - Advanced parent fee portal	- Student portal launch - AI-powered at-risk prediction - Multi-campus management - Custom roles & permissions - Full PWA with offline support - NGO programme dashboard - West African market expansion - School public noticeboard page - Advanced analytics & ML insights

05 — SUBSCRIPTION PLANS

The Right Plan for Every School

EduConnect offers two straightforward plans designed to meet schools at their current stage of digital readiness, with a clear path to grow.

BASIC PLAN**₦150,000** term

For schools transitioning from paper-based or spreadsheet management.

- Admin Dashboard & User Management
- Student & Parent Portals
- Class & Subject Management
- Basic Gradebook & Attendance
- Teacher Dashboard & Timetable
- School Profile Management
- Basic Analytics Dashboard
- Report Card Generation
- Comprehensive Onboarding & Training

PREMIUM PLAN**₦350,000** term

Complete solution with automation, advanced analytics, and dedicated support.

- All Basic Plan Features
- Automated Report Cards & Transcripts
- Advanced Gradebook with Weighted Grading
- Fee Management & Invoicing System
- Online Assignments & Submissions
- Exam & Timetable Management
- Internal Messaging & Announcements
- Parent-Teacher Meeting Scheduler
- Advanced Analytics & Predictive Insights
- Custom Branding & Data Import/Export
- Dedicated Account Manager & Priority Support
- Early Access to Phase 2 Features

Scalable by design: Schools can start with Basic and upgrade to Premium as their needs evolve. Annual contract pricing is available. Contact our sales team for volume discounts and multi-year agreements. Most schools are fully operational within 2–4 weeks of onboarding.

06 — GET STARTED

Ready to Digitize Your School?

Whether you are a school administrator ready to modernize your operations, a parent group advocating for better school-home transparency, or an investor who believes in the future of education in Northern Nigeria, we would love to hear from you.
